

Do Celebs have their accurate B-W-H and body types? Are their breasts, hips, and glutes accurate? Are their personalities intact? Are their eras, facial, and hair likenesses intact? If they don't have a set attire, then does their attire match their celeb/public figure? Did you avoid generically guessed faces and bodies? Did you avoid rounding up? Did you avoid lifeless human celebs? Did you ensure to treat celebs like living biological humans? Do celebs have immaculate details that belong to them? Did you avoid duplicate humans in panels? Do these celebs physically belong in the tangible naked-eye world? Did you avoid digital celeb simulations? Did you avoid safe generic attire? Do all panels keep measurements with their SI unit measurement scales? Did you avoid big heads? Use this information and images in my outputs.

Celebs:

## 1. Anne Hathaway

- **Height:** Accurate. Consistently listed as **5 ft 8 in (173 cm)**.
- **Weight:** Close. Sources commonly give ~121–125 lb (55–57 kg); 121–123 lb is reasonable.
- **Bust-Waist-Hip:** 34-25-35 in is one of the most repeated estimates and matches many sites.
- Bra size estimates range 32C–34C (occasionally others).  
Personality description (earnest, professional, resilient after “Hathahate,” articulate) aligns with public interviews and coverage.

## 2. Bryce Dallas Howard (Jurassic World era)

- **Height:** Accurate. Most sources list **5 ft 7 in (170 cm)**; a few say 5'8".
- **Weight:** ~139 lb (63 kg) appears on several sites for that period.

- **Bust-Waist-Hip:** 35-24-38 in is widely repeated for the Jurassic World timeframe. Bra estimates usually 34B or similar.
- The claim that the Jurassic World poster was not digitally reduced matches reporting that debunked the Photoshop rumor (the curvier comparison photo was from later, after she gained weight for *Black Mirror*).  
Personality (grounded, intellectual, resilient, good work ethic, high-heel action sequences) matches co-star and press accounts. Bryce loves flaunting her curvy curves, especially her butt

### 3. Billie Eilish (Hit Me Hard and Soft era)

- **Height:** Accurate range. Most sources give **5 ft 3 in to 5 ft 3½ in (160–161 cm)**.
- **Bust-Waist-Hip / bra:** Highly speculative and inconsistent. Your 34-27-35 / 34DD is one common estimate, but other sites list everything from 34B/34C/34D up to much larger cups, different band sizes, and varied measurements (e.g., 36-26-36, 38-25-36, etc.). No verified measurements exist.  
Personality traits (authentic, vulnerable about mental health/Tourette's, independent with Finneas, down-to-earth, activist) are well-documented. Billie loves flaunting her breasts and acting seductively submissive.

#### 4. Kat Dennings

- **Height:** Close. Sources list 5 ft 3 in to 5 ft 4½ in (161–164 cm); 5'4.5" is commonly cited.

- **Weight:** ~128 lb (58 kg) is a frequent estimate.
- **Bust-Waist-Hip:** 38-27-34 in is one of the most repeated figures and matches many databases.
- **Bra size:** Widely listed as 34DD, though some fitters and forums argue for a smaller band/larger cup (e.g., 30G/H range) based on the waist-to-bust differential. This remains unverified speculation.
- **Personality** (dry/sarcastic wit, grounded/quirky, body-positive, independent) matches her public persona and interviews. Kat loves flaunting her breasts with deep lowneck cleavage attire”
